SIBAM DAS

B.Tech (AI & ML) | University of Engineering & Management, Kolkata
7679823331 | sibamdas452@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI & ML undergraduate (CGPA: 8.45) with proven IoT, Computer Vision, and Deep Learning project experience. Passionate about building production-ready models and embedded systems that solve real-world inefficiencies backed by quantifiable results in automation, security, and data analytics. Focused on expanding expertise across core areas of Machine Learning.

EDUCATION

B.Tech (AI & ML) – University of Engineering & Management (UEM), Kolkata 2022 - 2026 | CGPA: 8.45

Higher Secondary – Paranchak Siksha Niketan 2020 - 2022

Secondary – Vivekananda Mission Asram Sikshayatan 2019 - 2020

EXPERIENCE

Data Science Intern (Virtual) – CodSoft Mar 2025 - Apr 2025

- Leveraged a remote agile workflow to efficiently process a 2,000+ customer feedback dataset, boosting sentiment analysis accuracy by 12% via advanced Python and Scikit-learn text preprocessing.
- Maximized virtual collaboration and model iteration speed by implementing Git-based version control and presenting weekly performance dashboards to a cross-functional team.

PROJECTS

Automated Plant Watering System – Raspberry Pi, Arduino

- Engineered an IoT smart irrigation prototype that autonomously regulates water flow via real-time soil moisture data, achieving 30% water conservation with instant GSM-based SMS alerts.

Quantum-Inspired DL for Cryptography – TensorFlow, Keras

- Architected a hybrid anomaly detection model simulating Quantum Key Distribution (QKD) environments; successfully identified network intrusions with 91% accuracy in breach simulations.

Real-Time Facial Recognition Attendance – Raspberry Pi, OpenCV

- Deployed a Haar Cascade-based pipeline that automated student check-ins, slashing manual entry time by 70% for 50+ students with instant MySQL database logging at 15 FPS.

TECHNICAL SKILLS

Languages: Python (Adv.), Java, C, SQL, JavaScript, HTML5, CSS3

ML/DL: TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV

DB & Tools: MongoDB, MySQL, SQLite, Git, Jupyter, VS Code, Arduino IDE, Raspberry Pi, Linux

LEADERSHIP & ACHIEVEMENTS

- Led a 4-member capstone team as Student Project Lead managed Agile sprints, delegated tasks, and ensured 100% milestone adherence.
- Recognized in Top 10% of B.Tech cohort (1st year) and awarded Best Project for IoT irrigation system at a departmental hackathon.
- Completed CodSoft Internship with Certificate of Excellence and presented 2 AI/ML prototypes at the University Tech Exhibition.
- **Languages:** English, Hindi, Bengali (Professional) | **Interests:** Machine Learning, Quantum Computing, Competitive Programming.
